

## VISION

FIRST & LAST NAME: \_\_\_\_\_

Vision means: "I can see what I want to be" (in my imagination). Think about your goal. A goal is something you really would like to do, be or have. You must be willing to work hard to achieve your goal! Vision helps us to picture ourselves achieving our goals before we actually achieve them. We can imagine what we would see, hear, feel, touch, taste and say at the moment we achieve our goal. That is what it means to have strong vision! So if your goal is to bake a cake and give it to your parent, you might SEE your parent's happy face, HEAR your parent say "thank you!" and TASTE the yummy cake you baked! **Read about our friends below. Circle the sentence that shows their vision of their particular goal.**
